Bauman Moscow State Technical University, Moscow, 105005, Russia

***Annotation.** The costs of globalization affect the population of the planet as a protracted, destructive distress. According to this, the problem of preserving the students' health has become very important. The efforts of the University leadership should be aimed at creating not only a high-tech and intellectual, but also healthy environment in the University. This will humanize higher education, and create competitive advantages of graduates of Russian universities in the world labour market.*

***Keywords:** globalization, students' health, development of higher school, health saving, health saving technologies, prophylaxis.*
