
Influence of information technology on the formation of the Global World

© A.V. Chernysheva, S.A. Makarychev

Bauman Moscow State Technical University, Moscow, 105005, Russia

The article deals with information technology, its impact on processes of globalisation in the modern socio-cultural space. The scientists analyse information technology, they strictly differentiate such concepts as “information society”, “globalisation”, “informatization”, revealing both positive and negative consequences of globalisation. The authors try to forecast further development of information society in the globalizing world.

Keywords: *information society, information and knowledge, globalization, information globalization, global information space, scientific-technical revolution, global scale, achievements and discoveries.*
