Bauman Moscow State Technical University, Moscow, 105005 Russia

Annotation. *At the present time the questions of preservation and strengthening of health, including educational environment, become very important due to the environmental causes and the prevalence increase of physical inactivity, caused by the traditional reasons in combination with the rapidly developing of information and communication technologies. Taking into account the opportunities to participate in research and new developments, provided for the student by the educational environment, it is reasonable to extend it by various innovative medical and technical technologies.*

Keywords: health-saving innovation technologies, medical rehabilitation, preventive medicine, treatment-and-health-improving physical training, personalized medicine.

Gertsik Yu. G., Ph.D., Assoc. Professor of the Valeology Department of Bauman Moscow State Technical University. Fields of activity: economic and biological aspects of health and rehabilitation technologies. e-mail: ygerzik@bmstu.ru
