
On the features of foreign language teaching in Bauman Moscow State Technical University

© M.V. Markova

Bauman Moscow State Technical University, Moscow, 105005, Russia

This paper reviews linguistic and cultural competences required from a technical university graduate according to the local educational standards. The author outlines issues typically preventing students of Bauman MSTU from successfully mastering these competences and suggests a methodology for teaching a second language in a technical university. The said methodology takes into account psychological characteristics of students and relies upon information technology.

Keywords: *linguistic competences, second language acquisition, multimedia technology, cognitive styles*
