# The Soviet tehnokratizm in 1917 — 1930th

© B.N. Zemtsov

Bauman Moscow State Technical University, Moscow, 105005, Russia

*The main objective of the article is to examine the attitude of Bolsheviks and the party and state leaders of the 1920–30s to technical sciences and its representatives. The research explored the reasons of establishing a technocratic approach to economy in the party and state environment. The findings of this research illustrate the importance of complex objective and subjective reasons, both of internal and external nature.*

**Keywords:** *tehnokratizm, scientists and power, industrialization, political elite.*
