
Teaching foreign languages with computer technology

© D.N. Lufarov

Moscow Regional State University, Moscow, 105005, Russia

The author provides personal interpretation of “electro technical means of teaching” concept. He investigates up-and-coming field of means of teaching exploiting off-the-shelf computer technologies. The readers will benefit from brief review of author’s personal experience of using these techniques for teaching a foreign language as well as his attempt to explain how these teaching means are going to fit into the whole system of education.

Keywords: *means of teaching, technical means of teaching, computer means of teaching*
