
Middle class in Russia in tough survival environment

© T.V. Rysina, E.V. Kiselyov

Bauman Moscow State Technical University, Moscow, 105005, Russia

The article reviews formation of middle class in Russia. It studies both quantitative and qualitative aspects. It highlights the role of the “new” middle class in the economic development. The authors have determined criteria and functions of traditional and new middle class under the increasing effects of crisis.

Keywords: *middle class, traditional middle class, “new” middle class, money incomes differentiation, creative class.*
