# Features of teaching Mathematics to foreign students

© S.I. Shishkina, I.I. Bludova

Bauman Moscow State Technical University, Moscow, 105005, Russia

*Foreign students have been trained in the BMSTU since 1952. Curricula compiled for them are fully consistent with the University training programs and take into consideration students' national specificities, the need for social adaptation, learning foreign language in parallel with obtaining professional skills. In order to achieve the positive effect it is necessary to optimize the selection of educational material and improve the ways of presenting information analyzing the effectiveness of assimilation of the material studied.*

**Keywords:** *foreign students, mathematical training, educational material.*
