
Cyber diplomacy: new challenges of international maritime piracy and methods of information warfare

© D.A. Tsesar

Diplomatic Academy of Russian Foreign Ministry, Moscow, 119021, Russia

The article analyzes the new evolutionary form of international public relations – information or cyber diplomacy. The challenges the international community is faced are examined in the framework of international relations and the phenomenon of the cyber-diplomacy is considered as the basis for strategy of the government machine in the regulation of social relations in the field of the "public" diplomacy. Along with the introduction of cyber diplomacy into foundations of state administration using mass media for by international terrorist and pirate associations for their own purposes is shown. These factors escalate the threats facing the international community, transforming them into global problems of modern age. It is noted that it is necessary to strengthen legislation and to ensure the state control over strategic data information security.

Keywords: *piracy environment, international terrorism, cyber diplomacy, informational diplomacy, international maritime piracy, information security, state control, informational terrorism.*
