*The article reveals the insufficiency of explaining the criminal behavior by only biological and (or) social factors. This explanation represents a person as a passive result of genotype or social conditions and relieves the person from responsibility for his or her behavior. The article outlines the contour of criminal behavior triple determination concept: heredity, social environment and personal principle - the person free will, his or her reason and self-determination, which can dominate heredity and unfavorable social conditions.*

**Keywords:** *inclinations, abilities, criminal abilities, biosocial selection, aggressiveness, free will*
