Bauman Moscow State Technical University, Moscow, 105005, Russia

An attempt of systematic approach to the description of categories of professional computer discourse has been done. Discursive features of the text (adresatnost, authorship, intertextuality), and linguistic resources which they are attributed, are considered on the material of a tutorial on the basics of computer science — one of the most representative genres, demonstrating computer professional discourse.

Keywords: *professional computer discourse, adresantnost, authorship, intertextuality.*

Orlov E.A. (b. 1958) graduated from Historical-philological Faculty of the Peoples' Friendship University of Russia in 1985. Senior Teacher of the Russian Language Department of Bauman Moscow State Technical University. Author of several works in the field of information and computer technologies and methods of teaching Russian as a foreign language. e-mail: orlov_2006@yahoo.com
