Novosibirsk State Technical University, Novosibirsk, 630073, Russia

The article suggests an author's version of the economic, political and ideological historical events assessment criteria. We emphasize that these criteria have to contain public information about the development of the country in the directions mentioned above. In the author's opinion, these criteria allow having a bash at the systematic fact-based analysis of the primary results of the country development in the specific historic period. The obtained results range of use comprises economic, political and ideological aspects of the country development.

Keywords: *criterion, assessment, history, process, objectivity, scientificity*
