

Formation and development of the concept of intuition in philosophy of the Modern Age

© S.G. Zhdanov

Bauman Moscow State Technical University, Moscow, 105005, Russia

The study focuses on the formation of the concept of intuition, and, in particular, intellectual intuition in philosophy, starting from the works of philosophers of the seventeenth century, such as Bacon, Descartes, Spinoza, and to the works of such outstanding representatives of German classical philosophy as Kant, Fichte, Schelling, and Hegel.

Keywords: intuition, doubt, criticism, induction, deduction, German classical philosophy, the philosophy of the Modern Age, cognition
