

## Engineering education: from uncertainty to sustainable development

© I.R. Nazarova

Bauman Moscow State Technical University, Moscow, 105005, Russia

*The article is devoted to the issue of reforming education in the conditions of complexity and uncertainty of the society as a whole. We emphasize the role of the sustainable development concept as a context in the selection of guidelines for engineering education.*

**Keywords:** education reform, context of education reform, sustainable development, engineering education
