
Humanized didactic structure of laboratory study of technical objects design

© A.A. Dorofeyev

Bauman Moscow State Technical University, Moscow, 105005, Russia

The structure is determinate by objective laws of projective and creative human activity and cognitive features of educational process. Study is build in accordance with didactic sequence “function — construction — material — technology” with reveal of principles of design with illogical creative elements that included in professional mentality and competence.

Keywords: *laboratory study, didactic, function, construction, material, technology, designing, technical creativity, ESKD (ECKD).*
